If you do not agree to these rules, you must not enter the competition. Fujifilm reserves the right, acting reasonably, to disqualify entrants who do not comply with these rules.
2. **Who may enter:** The competition is open to citizens of the Southern African Development Community ("SADC"). The competition is not open to directors, members, partners, employees, agents or consultants of Fujifilm, any person who controls or is controlled by Fujifilm, or any supplier of goods or services in connection with the competition, or their respective spouses, life partners, business partners or immediate family members.
3. **How to enter:** Register your details online at [www.fujifilmdesignchallenge.co.za](http://www.fujifilmdesignchallenge.co.za) ("**Website**") by no later than 23h59 (South African time) on 31 July 2018. Within three business days from registration closing date, Fujifilm will email you artwork setup guidelines in order to assist you in designing your entry.

The competition is limited to one entry per person.

The competition has three categories namely:

- **Interior design:** decorate a school, hospital or office space from floor to ceiling.
- **Retail environment:** get creative with window graphics, signage and point of sale merchandise in the retail environment.
- **Free category:** let the creative juices run free!

Entrants are required to incorporate one or more of the following Fujifilm Acuity LED 1600 II features in their designs:

- **Clear and white ink:** Clear ink offers the luxury to highlight or enhance print with high-gloss spot finishes. High density white ink can be used to produce creative effects on clear and coloured media. Colours, white and clear inks can be printed simultaneously.
- **Raised ink printing:** LED UV cures the ink instantly so there is no need to wait for the print to dry before finishing or shipping. This technology enables you to print multiple layers: you can print an imaged raised up to 9 times.
- **Plastic and heat sensitive substrates:** LED UV lamps use a fraction of the energy of conventional curing systems, which means you can work with heat-sensitive media without deformation.
- **2 or 3 Layer printing:** Simultaneous two or three-layer printing with colour, white and clear inks provides the ability to produce high value creative prints. Print colour-white-colour layers in one pass for two-sided images on transparent materials.
- **Colour media print made possible with white inks:** High density white inks and multiple layer print enables printing of vibrant images onto a wide range of coloured substrates.
- **Rigid media print ability:** Quick switch between roll and rigid printing. Flatbed feed and receive tables are used for printing rigid media. It supports substrates up to 1 610mm wide and can print on rigid sheet substrates up to 13mm thick.
- **High quality and fine text print:** Achieve smooth tones and outstanding close-up clarity thanks to light inks, variable drop printheads and dot gain control. The Fujifilm technologies are accurately tuned to deliver brilliant images at speed.
